Flexible, Reliable, Efficient

PROUD TECHNOLOGIES PVT. LTD.

Software Development & Training Services

History

Established in 2009 with a vision of Transforming thoughts of our customers into a real product by pursuing technology leadership on reasonable economics and to excel in field of I.T. with a team of competent professionals by providing value added services to our customers. We are NASSCOM Member & ISO-9001-2000 Certified Company. Since our inception to focus was on IT segments: software applications development and web related services. With the passage of time, we have grown and today we are equipped with a highly competitive and committed team of IT professionals who deliver solutions for business of diverse needs with breaking performance.

Today we work at a national and at a global level, in challenging environments, meeting deadlines and completing projects within time and budget constraints. Our software solution services are backed by 24x7 customer support. In addition, we offer upgrades with growing requirements and modify the packages as and when needed

Leadership

Mr. Naresh Kalra (Founder & MD) – founded Proud Technologies Pvt. ltd. (PTL) with one basic idea - to build an organization which felicitate startup businesses and non-commercial organizations to streamline their functions with help of I.T solutions on reasonable economics. He strongly believes that ordinary people are capable of extraordinary things and that the key to this is creating highly motivated and charged teams. He loves to take interest in developing teams and leaders and invests significant time as a guide in Proud Technologies leadership Development programs. PTL is committed to deliver value for customers.

Vision

Our mission at Proud Technologies Pvt Ltd is to differentiate from the crowd by achieving its economic objectives by uplifting those target customers which are not having equal level playing I.T field through technology leadership.

To be a globally respected corporation that provides best in class business solutions, leveraging technology, delivered by best-in-class people.

Mission

To achieve our objectives in an environment of fairness, honesty, and courtesy towards our clients, employees, partners and society at large.

Methodology:

As economic changes get intensified, we believe creativity should not be relegated only to marketing communication & designing of Web sites and networks. Creativity and fresh perspective is essential in every single step of our interaction with our clients.

The overall steps involved are:

- **Pre - Development Analyses:**

  Here we understand the overall business of the client, the objectives, the strategies and the target audience. We analyze the requirements of the client and come up with path breaking ideas and solution. We also make a thorough need analysis of the technology required.

- **Conceptualization:**

  This is where we involve a cross functional team of professionals from strategic planning, web designing & technology areas. A number of concepts are developed and discussed with the client. As we develop these potential solutions, the client is closely involved in this process. Once this is finalized, we move on to the building or the development stage.

- **Development and Testing:**

  Our software, technical and design professionals now start work on the project. The Project Manager reviews the progress of each team with the project leader. Vigorous testing follows.

- **Implementation:**

  During this stage, we work closely with your team to ensure that the implementation is done smoothly. Integration with your system with its existing legacy is ensured. We believe this is the real beginning of our relationship with our clients. We know that being the first on the Net is not as important as delivering value consistently to our clients, customers.

Quality Policy

Proud Technologies is committed to providing software services of assured quality through solution leadership and continual process improvement, ensuring customer satisfaction.

We understand its direct impact on the businesses of clients. Our Quality Management is more than a set of processes to ensure product quality and on-time delivery.

Our quality practices is continuously enhanced through regular internal audits, project audits (each project has its own quality control plan), assessment of process parameters, and client feedback.

Our Passion for Quality permeates everything we do with robust systems and processes to facilitate consistent high quality deliverables to our clients every time.

Our objective is to deliver quality and high standard software applications. Our quality policies ensure that each application we develop goes through all the steps of software development life cycle, this helps us confidently say that 'We Deliver Quality'.
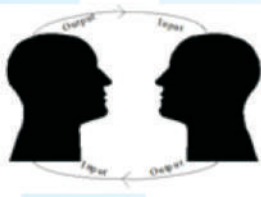

Following Constitutes Our Quality Policies:

W3C Standards – World Wide Web Consortium (W3C) is an international community dedicated to the development of standards for deploying web-based applications. Every website we design strictly adheres to standards defined by W3C, and is validate by W3C online validator before it's delivered.

Documentation – Documentation plays a vital role in development of every software solution. It not just help software engineers to know what needs to be developed but also proves to be useful in accomplishing future enhancements and software maintenance. Every project we undertake begins with conceptualization phase and outcome of this phase is well documented working, flows and data flow diagrams for the application to be developed.

Organized Approach – Our systematic way of working and involvement of resources with expertise required based on the stage the development process has reached, enables us to accomplish seamless development and delivery of our projects.

Effective Communication – For every project we depute one point of contact for our clients. This person not just coordinates delivery of the project but also acts like an interface between the client and the production team. And this person is accessible via emails, phone or IM.
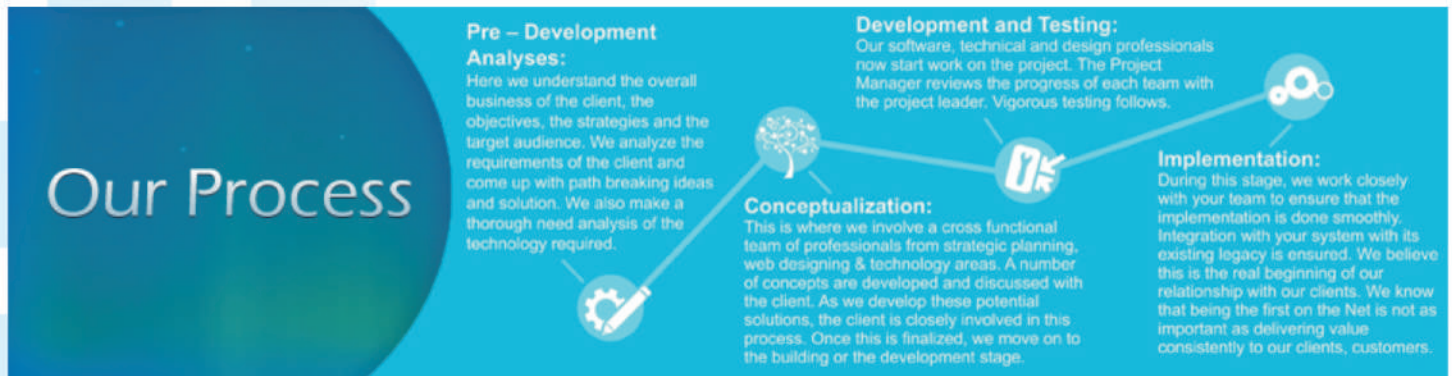

Testing – We have a dedicate team of QA & Testing engineers, these resource stay involved during the complete development process. While the design & development is being done they draft test cases, which are executed on the completed application to ensure that the application delivered fulfills the specifications & requirements in their entirety.

Our Values:

We believe that the softest pillow is a clear conscience. The values that drive us underscore our commitment to:

- **Customer Delight:** To surpass customer expectations consistently
- **Leadership by Example:** To set standards in our business and transactions and be an exemplar for the industry and ourselves
- **Integrity and Transparency:** To be ethical, sincere and open in all our transactions
- **Fairness:** To be objective and transaction-oriented, and thereby earn trust and respect
- **Pursuit of Excellence:** To strive relentlessly, constantly improve ourselves, our teams, our services and products to become the best
- **Intense** Being passionate and committed about everything we do.
- **Creative** Demonstrating the creative spirit by giving 'out-of-the-box' solutions.
- **People Driven** People come first. We care about people we work with.
- **Ethical** Displaying integrity, honesty, respect for other people, taking responsibility for one's actions form the core of one's value system.
- **Socially Conscious** Making direct efforts to effect a positive change in society.

Our Process

Pre – Development Analyses:
Here we understand the overall business of the client, the objectives, the strategies and the target audience. We analyze the requirements of the client and come up with path breaking ideas and solution. We also make a thorough need analysis of the technology required.

Conceptualization:
This is where we involve a cross functional team of professionals from strategic planning, web designing & technology areas. A number of concepts are developed and discussed with the client. As we develop these potential solutions, the client is closely involved in this process. Once this is finalized, we move on to the building or the development stage.

Development and Testing:
Our software, technical and design professionals now start work on the project. The Project Manager reviews the progress of each team with the project leader. Vigorous testing follows.

Implementation:
During this stage, we work closely with your team to ensure that the implementation is done smoothly. Integration with your system with its existing legacy is ensured. We believe this is the real beginning of our relationship with our clients. We know that being the first on the Net is not as important as delivering value consistently to our clients, customers.

Our Culture

At PTL (people) are everything. We believe in a culture which empowers people to make decisions, make a difference to our customers via innovative solutions and most importantly, have fun as they embrace the professional journey.

We are committed to:

Customer Success: We are driven by making our customers successful. Our team are curious and talented - to understand the challenges customers are facing and to implement solutions quickly to amplify time-to-market for customer to stay ahead of the game.

Continuous Innovation: We believe that everyone is capable of innovation and innovation should be a daily practice as opposed to a one-time event. Innovation at every step of the way in our software delivery is a key measure and every team member is encouraged to continuously come up with innovative ways to create a difference.

Software & Application Development Services:

Features of E-CIMS and visa online Application along with Digitization

(Case Information Management System)

This application is aimed at improving a long lasting processing system on visa. It is also aimed at keeping records of all immigrants and for processing visa with view of modifying it into a full computerized system. The study covers the areas of application entry, record verification, list generation, code numbering and maintenance of the managed information. The new system to be developed will be very easy to use, and gives answers to report generation. Problems which evolved from the existing system as a result of inefficiency will be notified and new system design implemented. We are always open to work on PPP Model all over World Countries.

Various qualities of the E-CIMS will be:

♦ Safe, secure and reliable
♦ Easy to navigate and accessible anytime
♦ Proprietary Online Case Tracking allows clients to view the status of their case
♦ Allows multiple case files for clients avoiding duplicate collection of information
♦ Provides important email alerts on cases
♦ Provides instant access to Attorneys and Paralegals
♦ Allows clients to upload and download documents
♦ Contains an electronic copy of all materials that are prepared and submitted to Embassy
♦ Knowledge base contains forms and checklists
♦ Keeps track of all invoices and payment activity
♦ Allows clients to monitor the progress of each case
♦ It's good for the environment

E-CIMS will be a comprehensive software package to cater to all the software needs of the various hierarchical levels of Embassy Office. The benefits of CIMS will start reaching the stakeholder i.e. people applying for Visa to Embassy, Officials posted in various offices of Embassy located around the globe as well as the general public at large by way of publication of all their required information on the Embassy's Website. In the same way, the status of Visa application will also be made available on its website. Various modules incorporated in the application will be:

- Centralized Filing for Visas online	- Registration & Filing
- Party details	- Documents
- Fee Collection and updates	- Case review and Verification
- Preparation of case folder	- Case problem resolution
- Communication with applicant	- Scheduling of Interview
- Security Advisory Opinions	- Backlog Data & Case detail Entry
- Date of Delivery (Date wise)	- Office Proceeding
- Visa Generation	- Queries
- Reports	- Connected cases

Cloud enabled Content Management Systems:

- Content upates on the website
- Data management
- Database backups
- Catalog Management
- Server Review & recommendations
- Code Restructuring
- Performance Optimization
- Functionality Enhancements

Re-Design & Re-Development Services

Put Your Website In Power Again

A website demands complete MAKEOVER and FACELIFT when it loses its capability to match the changing tastes of the niche and upgrading algorithms of search engines. Website redesign solutions that PTL renders are not only Stress Free in nature, but also guarantee you the most coveted results in the coming time.
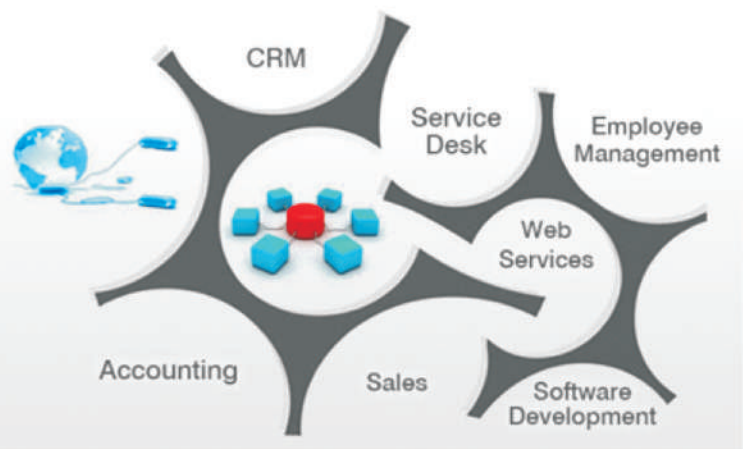

Transforming site contours is what we specialize in. To help our clients excel in their business promotion endeavors, we add New Functionality, Professional Image and Engagingness to existing websites to revive their revenue generation capability. We at PTL understand the mercurial demand of users, search engines and businesses; and direct our efforts to bring stagnant businesses into motion.

Fresh Look, Revised Site Map and Latest Web Standards are core areas we emphasize on under website remodeling activities we undertake.

For our design wizards, every project is 'BIG'. So they mishmash high-end technologies, latest designing trends and altering user's taste to add a classically fresh tinge to existing websites that drive more visitors. By creating a magnetic virtual environment, our nimble design experts give each website that coveted FEEL, APPEAL and EFFECT, it's lacking.

Our Website Redesigning Process begins with:

- Examining the existing Website
- Analyzing the recent industry trends and niche tastes
- Identifying the areas of the existing website which needs upgradation for various parameters
- Discussion with the Client and suggesting Required Changes
- Redesigning the Website

We garnish websites with a colorful tincture, superior navigation, and extraordinary site architecture to create a perfect blend of Beauty and Functionalism. We know, we are good at meeting challenges. So give us a chance to prove our caliber and uncommonness we boast of.

Accessorize Your Website Features &Functionality.

The simple ideology is each website demands 'UPGRADE and REPAIR' after some time. And yours is no exception.

So help yourselves with our exclusive, unparalleled feature and functionality enhancement services. And enjoy the fame, you've just dreamed of!

ERP (Enterprise Resource Planning):

ERP or Enterprise Resource Planning software is a systems management solution which helps in improving the performance of an organization's resources; namely men, material, money and equipment

It achieves this by better planning, managing and controlling key functions across the various departments of an organization. This multi-module application software integrates various activities, such as product planning, parts purchasing, inventory control, product distribution to order tracking etc

Solutions that support your company's Business goals and Practices are not out of your Reach. We have been delivering the solutions and support offerings that open up Applications you previously thought would be Impossible within your company's Budget.

Enterprise solutions provide a centralized framework for all data and processes of an organization. It integrates all aspects of a business from planning to inventory control, manufacturing, sales, marketing, finance, customer service and human resources. We specialize in developing and implementing customized ERP solutions.

If applied thoroughly with full support of the participating departments, ERP software solution can help an organization in optimizing the use of its resources. It can help in drastically cutting down Material Wastages, Inventory shortages, delivery pilferages, and help in greatly improving productivity, customer service, quality control, and client's delivery etc. Our services of ERP software is related to Stock & Billing management, Hospital management, MLM software, Credit & Drift Management Software and Property Dealers tailor made ERP.

We understand that every client has different set of requirements and business objectives when it comes to choosing ERP solutions.

Dynamic CRM & Cloud CRM Systems:

Customers are central to any organization and it is very important to build healthy relationships with customers for sustained long term profits.

CRM or Customer Relationship Management is a vital aspect of any business strategy. CRM, or Customer Relationship Management, is a company-wide business strategy designed to reduce costs and increase profitability by solidifying customer loyalty. True CRM brings together information from all data sources within an organization (and where appropriate, from outside the organization) to give one, holistic view of each customer in real time. **PTL provides online and on-site consulting services to assist your office with getting maximum profit** from CRM project. **PTL has vast experience in CRM development and CRM Customization.**

PTL's CRM solutions help you communicate with your customers better, make long term fulfilling relationship and increase profitability. Seamless integration ensures the system behaves according to your own business logic and workflow style. Our experts implement high quality CRM solutions at extremely competitive prices ensuring that your business thrives on healthy customer communication.

The question in today's increasingly dynamic and competitive market environment is not whether you need CRM implementation or solutions, but what solution works best and whether it is an off-the-shelf package or a custom solution that will work best for your business

Today, governments at all levels are also adopting proven best practices and technologies to improve customer service and business performance. The impact of this change is enormous – both for citizens in their view of the responsiveness of government and for government itself as it embraces a new view of the citizen as a customer In this customer-centric e-government context, use of technology plays a key role. It is a catalyst that challenges age-old assumptions about how governments should operate, especially how they create value for their constituents by improving convenience, ease of use, offering better information faster and creating a higher level of service.

Proud Tech helps government implement a unified gateway and portal solution that offers a wide variety of services, including renewing driver's licenses, obtaining copies of birth certificates, and paying utility bills. Now citizens, students, businesses, and investors have access to literally hundreds of online services anytime, anywhere, through a simple browser.

Proud Tech revolutionizes how government agencies and departments engage and interact with people and among each other, transforming and extending government services to provide a richer, more productive and trusted experience to individuals, agency personnel, and public services through our total software based video-conferencing solution

Startups, SMEs to Large Scale Enterprises

We are working from corporate clients to Home Users, Our strength lies in our ability to service clients ranging from Start-ups, small, medium and large scale enterprises& Home Users etc., Our client tale goes across the globe, we are not only serving domestic users but also creating magic for our global clients..

We have on board young professionals who take pride in the commendable success. Proud Tech has achieved ever since the beginning. As a customer you are likely to get more than what you expect, as Proud tech proudly announces itself as the finest provider of IT solutions across the globe, that each industry has unique processes, priorities and challenges. More importantly, we know from experience, that each of our clients' businesses is unique.

Education Sector Services:
Education & New Technology is always been our Passion.
As William Butler Yeats said, 'Education is not filling of a pail, but the lightning of a fire'.
Creativity is the most wanted thing for both the students and the education providers.
Education & Technology which is linked with 'Future' of the learners should be carefully dealt with. The creative educators shape up creative brains which are very fast, to face a creative and competitive world.

Our vision is to create &evangelize a platform which shall not be a mere source of curriculum provider, but a unique place that enables the learner to explore the knowledge universe, with all necessary skills to conquer the forthcoming competitive future.

'Education' has the power to transform the world. Recognizing this, Proud Tech offers solutions that make education more enriching. At a time when competition to attract the best students and other trends in higher education are causing dramatic changes, our solutions help educators impart personalized attention to students while expanding the institution's capabilities and reach.
